

Open Business Models & Open Innovation

An Experiential Learning Course with Real Companies and Case Studies

Three Unit Course

Course Number:	UGBA 190T.1
Course Title:	Open Business Models & Open Innovation
Instructor:	Solomon Darwin
E-mail Address:	darwin@haas.berkeley.edu
Meeting Location/Time:	TTh 2:00PM-3:30PM in C330; Office Hours: 3:30PM- 5:30PM
Class Format:	Students work independently in groups; an interactive project-based class
Graduate Assistant (GSI):	Dan Wong MBA Class of 2015 email: <dan.wong@berkeley.edu>
Recommended Reading:	<i>Open Business Models - Harvard Business School Press – Author: Henry Chesbrough</i> <i>HBS Cases will be assigned during the course – need to be downloaded from HBS website</i>

COURSE DESCRIPTION:

This course presents an opportunity for those students who are passionate about employing their innovative and creative talents to learn the process of Open Innovation to address the business model challenges of real companies. This semester, the students will come up with new business models for **Coke, Wipro, United HealthCare, Johnson & Johnson, Fujitsu and GE**. Students work with Senior Executives in groups of five to seven to formulate innovative solutions to address the issues the company is facing. The students will be given an opportunity to demonstrate their solid understanding of the process, concepts and strategies of the open innovation process. This includes exploring new business models and prospective markets in light of the changing economic landscape, social trends, and emerging technological advances. The intent of the course is to create heterogeneous groups to leverage the diverse experiences, skill-sets, and tacit knowledge of individuals within each group to frame and solve problems.

The business model solutions proposed by student groups need to be viable and scalable. The senior executives from each of the respective firms will judge the final presentations at the end of semester. The instructor will serve as a mentor/consultant/facilitator to each group within the class. The sponsoring company executives will provide a mid-point review to provide feedback and guidance.

Professor Darwin's previous business model innovation projects involving students and senior executives includes: Intel, HP, McKesson, Nike, Best Buy, Shell, Dole, United Health, Johnson & Johnson, SAP, Lenovo, Mindray, Huawei, Mattel, Standard Chartered Bank, Cisco and Ericsson, DreamWorks, FedEx, Tyco, WTA, Optum, Fidelity Investments, Toyota, Nestle, IBM, Xerox, GE, Philips, and Apollo Hospitals. The executives derived excellent insights and ranked the projects very highly over the past several years.

Course objectives:

1. Learn Experientially – Prof. Darwin will serve as a facilitator and consultant during class on projects.
2. Utilize creative talents of students within the student groups to address challenges of real companies.
3. Understand Open Innovation & Business Model concepts.
4. Engage with Senior Executives – Prof. Darwin will make introductions to appropriate executives.
5. Reward cross learning across groups and individuals students (cross-pollination)
6. Focus on break-through disruptive vs. incremental solutions
7. Work collaboratively with other groups and external segments for sourcing ideas.
8. Present results to senior executives for evaluation – major part of the course grade.

Course Layout: 1ST half of the course: Focus on providing tools for the business innovation project.

- The eight building blocks of a business model (5 min quiz)
- Examples of Closed vs. Open Innovation models (5 min quiz)
- Measuring Innovation: Key metrics of business performance (5 min quiz)
- Managing Innovation (5 min Quiz)
- Execution Plan (5 min quiz)
- Lessons learned from case studies of successful and failed business models (5 min quiz)

Course Layout: 2ND half of course: Focus on doing the group project in class time will be allocated to groups:

- Working with the professor and senior executives to frame the problem
- Researching, and analyzing the firm's financials, its industry, and markets
- Soliciting external ideas through innovation platforms
- Exploring alternative models
- Recommending an innovative business model solution

About the Instructor:

Professor Darwin is the Executive Director for the Garwood Center of Corporate Innovation at Haas. He comes with broad leadership experience in corporate management & academia. He teaches this course internationally at several prominent universities in European and Asian as well as in the Executive Education program at Haas and abroad. He has been recognized by his peers and students for his innovative leadership, teaching, and curriculum development. At Haas, he moderates key annual International Conferences, Innovation Forums, and the Dean's Chief Innovation Officer Round Tables. His teaching experience spans over 16 years. Prior to joining the Haas School of Business Berkeley in 2005, he was an Associate Professor for 9 years at USC's Marshall School of Business in Los Angeles. He is also the Associate Director for the Program in Open Innovation and works closely with Professor Henry Chesbrough "the father of Open Innovation."

His progressive corporate leadership experience covers a span of 14 years as a Senior Finance Officer at Bank of America; Director of Finance at First Interstate Bank; Corporate Controller at Glendale Federal Bank and Senior Financial Analysts at Motorola.

During his spare time, Solomon also consults and trains senior executives. The list includes Google, Genentech, Hewlett Packard, Health Net, UCSF Medical Center and several other Silicon Valley companies and startups, as well as businesses in Mexico, China, India, Russia, and Europe. He has been active in several humanitarian projects and founded a school and hospital for the poor in India.

Grading:

1. Class Attendance	100
2. Class Participation	100
3. Spot Quizzes (6 -1=5)	100
4. Mid-Term (Your BM)	200
5. Peer Evaluation	100
6. Final Project	400
Total Points	= 1,000

Important Policies that will affect the grade:

- Class participation for cross learning from each other is encouraged – side discussions during lecture time are not allowed. Cold calling will be utilized to track participation.
- No laptop policy: Lecture slides will be provided before the class and group sessions for taking notes.
- Attendance, attentiveness during class and being on time to class will help you greatly.
- Cell phones & Texting & Food is not allowed during class sessions.

PEER EVALUATION

Your Name: _____

Group #: _____

Please evaluate each group member's performance, excluding your own, for this project.

Assign a score from 20 (EXCELLENT) to 5 (VERY POOR) for each attribute listed, but do not rate yourself.

Your ratings will be kept confidential and will not be shared with other group members.

Item	Possible	NAME	member 1	member 2	member 3	member 4	member 5	member 6
#	Points	Categories						
1	20	Attendance at group meetings						
2	20	Preparation for group meetings						
3	20	Contribution of ideas						
4	20	Other contributions (research etc.)						
5	20	Teamwork						
<u>100</u>		Total points
